## Fauna – Revolutionary Audio Glasses

Fauna is a designer audio eyewear made to fit seamlessly into your life. These revolutionary audio glasses protect your eyes and provide vivid sound when listening to your favorite music, audiobooks, and when making phone calls. Available in both a sunglasses version and a blue light filter version, the glasses are perfect for outside activities and working in front of a screen.

What makes Fauna Audio Glasses unique in terms of audio technology is beamforming: With the sound travelling directly to your ear without major leakage, you will be the only one to hear your music, podcast or phone call - and no one else around you. On the other side, you will always be able to perceive your surroundings and hear what goes on around you as your ear canal is not obstructed.

Fauna is currently available in four designs. The lenses of the device can easily be exchanged for prescription lenses by an optician – the material used is Italian acetate, a standard in the eyewear industry and optimal for fit and wearing comfort. Fauna Audio Glasses come with a charging case that allows re-charging your glasses on the go.

Fauna connects via Bluetooth with your smartphone or PC; a specific app is not required. The glasses are controlled by touching and swiping on the temples. Thanks to our patented audio technology, the temples remain slim and lightweight despite all the electronics inside.

## Technical data

### Glasses

- Size: 145.5 x 46.5 x 153.5 mm (Memor and Spiro); 145.5 x 49 x 151 mm (Levia and Fabula)
- Weight: 50 g
- Lenses: ZEISS DuraVision® BlueProtect or tinted Carl Zeiss sun lenses, 1,8 mm thickness

### Charging case

- Size: 169 x 57 x 66 mm
- Weight: 190 g

### Audio

- Loudspeakers: 2-way sound system including a patented USound MEMS microspeaker and an electrodynamic woofer in each temple
- Frequency bandwidth: 250 Hz to 20 kHz
- SPL: 80 dB @ 1 kHz
- THD: < 5 % (1-20 kHz)
- 2 microphones with beamforming and echo cancelling

### Battery

- Standby mode: up to 20 hours
- Play time: up to 4 hours of music, voice assistant, phone calls
- Battery capacity glasses: 100 mAh
- Glasses charging time: max. 2 hours
- Battery capacity charging case: 1300 mAh
- Charging case charging time: max. 2 hours

### Compatibility

- Bluetooth 5.0 with a range of up to 10 metres
- iPhone 5 or later with iOS 10 or later
- Android devices with Android 6.0 or later

### Touch control

- Capacitive touch pad for tapping and swiping

### Temperature

- Operating temperature: -10°C to +40°C

### Water and dust resistance level

- IP55

# FAUNA

## Fauna Audio GmbH

Fauna was founded in 2019 with the goal to revolutionize the world of audio wearables and create a more natural, immersive sound experience. As pioneers in the field of MEMS microspeakers applications, we at Fauna know all about putting tiny, yet powerful speakers into audio devices and creating the best-in-class sound.

The technology implemented in our audio wearables is provided by USound, our B2B mother company that safeguards the know-how developed in many years of research and testing. With our team of 18 nationalities, we strive for excellence in audio with the wearers and users of our technology and their best sound experience always in focus.

## Visual Material

Apart from the 9 images in this press kit, we also offer an extensive collection of high-res photos and renderings here:
